

Laboratory of Electron Microscopy and Crystal Chemistry Institute for Chemical Research, Kyoto University

Research Information

PI Name : Hiroki KURATA

Position : Professor

E-mail : kurata@eels.kuicr.kyoto-u.ac.jp

Staff: Assistant Prof. Takashi NEMOTO

Staff: Assistant Prof. Mitsutaka HARUTA

Research Field

Research on crystal structure and electronic structure of functional materials by atomic resolution analytical scanning transmission electron microscopy. Surface excitations in nanomaterials are also investigated using spatial resolution electron energy-loss spectroscopy.

Research Facility

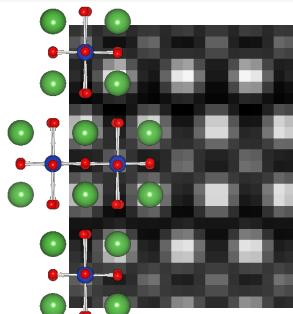

Atomic resolution analytical STEM

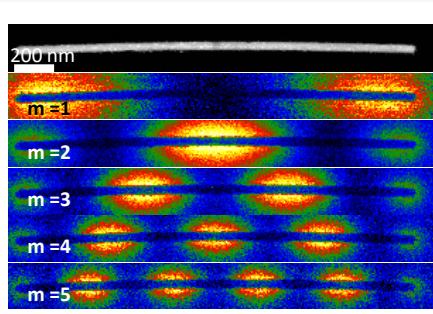

Cryo-TEM

Research Activities

STEM image of $\text{La}_{2-x}\text{Sr}_x\text{CuO}_4$ and hole mapping
Rhys. Rev. B 97, 205139 (2018)

Surface plasmon mapping excited on Ag nanowire
J. Appl. Phys. 124, 093103 (2018)

Comments

Shall we explore nanoworld?
